How do we go about creating deck?

1

Breakdown problem space

- Find KPIs
- Create a checklist of requirements : customer journey, wireframes etc

2

Secondary Research

- Company - Values, products
- Product - USP, value prop
- Problem - Trends, Success in similar industry

3

Primary Research

- Talk to people
- Empathise with users
- Refurbish secondary data
- Ask GPT

4

Brainstorm Solutions

- Check for customer journey
- Diverge as much as possible
- Find business impact ★

5

Prioritise

- Align with vision,
- Use RICE, MOSCOW
- Create your own

6

Roadmap

- 0 to 1 - will be MVP
- Check KPIs before phase 2
- 1 to 10 - Phase 2 etc

Canva & Design

1. **Talking header**
   Do not give side headings

2. **Key Take away**
   Useful during presentation

3. **Font & color scheme**
   Keep it uniform

4. **Copy Canva Designs**
   Search canva design

5. **Minimal**
   No graphics

6. **Wireframes**
   Use figma

blinkX

BrainAThon: Notifmaster Challenge

Team:
Vishal Kumar Jha
Aakriti Mendiratta
E.Tharun Sai

College:
Indian School of Business

BlinkX wants to accelerate its growth with a smart notification strategy

Product:

Online trading platform offering suite of financial services for both novice & experienced traders

Aiming to be the nation's premier glitch-free trading app, offering round-the-clock availability

Unique Selling Point

- **0 AMC**
  (for lowering entry barrier)
- **₹0 Brokerage**
  (maximising returns by minimizing costs)
- **AI & ML based insights**
  (for informed decision making)
- **Reliable and Glitch-Free Performance**
  (reducing the risk of missed opportunities)

Problem statement: Use push notifications to

- **Boost Engagement (KPI: DAU - Daily Active Users)**
  Nudge users to regularly open the app
- **Improve Retention (KPI: 1W Retention)**
  Reduce churn of users over time
- **Re-activate Dormant Users (KPI: Reactivation %, DAU)**
  Reinstill interest among users who have become inactive
- **Driving higher conversion by educating users (KPI: MTU - Monthly Transacting Users)**
  Enhanced brand loyalty, increased user trust, and a more informed user base.

★ **North Star Metric:** DAU

1 **Level 1 :** MAU, MTU

2 **Level 2:** Retention, Reactivation

✓ **Check:** NPS, Avg Rating

Company:

JM Financial is an integrated and diversified financial services group.

- **Vision**: To be the most **trusted** partner for every stakeholder in the financial world.
- **Belief system**: Earning **trust** is a process; Sharing **trust** creates great teams; Being **trustworthy** is the most efficient way of generating and retaining long-term business; **Self-trust** is the starting point of trusting others

JM FINANCIAL

38,000 Cr Equity
Avg. Daily Volume

Secondary Research Suggests that Millennials and GenZ are Fueling India's Online Trading Boom

Key Market Trends

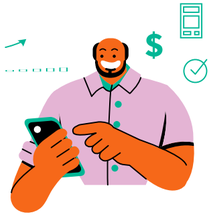

Growth of Neo Brokers in India

Total market size of $1.2B [1]

Expected to grow at 3.75% CAGR

Average Revenue Per User $9

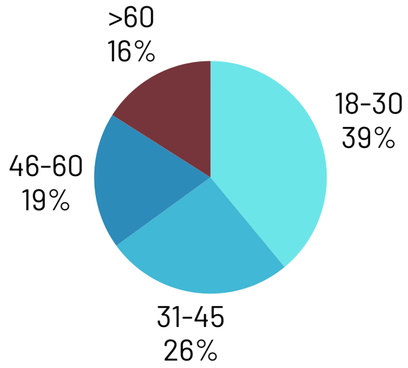

Rise of online trading platforms in India

71% Indians Prefer Online trading platforms for Equity Investing [2]

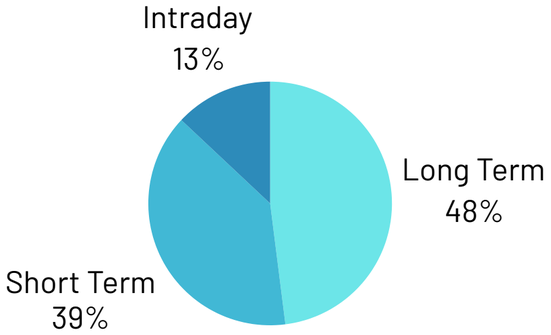

All time high inflows of ₹34,697 Cr into equity mutual funds, up 83% from ₹18,917 Cr [3]

Consumer Segments [6]

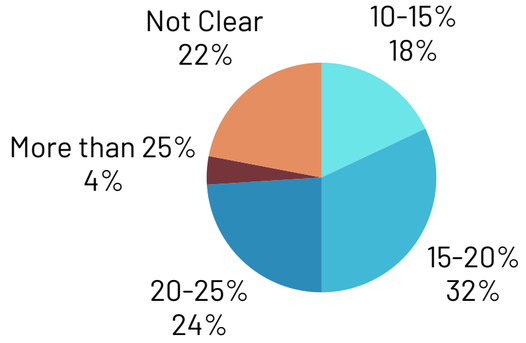

By Age:

By Investment Horizon:

Expected Return:

GenZ and Millenials constitute >60% of the Indian stock market Investors

Investors can be broadly classified into Short-term, Long-term and Intraday

Investors are driven to generate higher returns

But a One-Size-Fits-All Approach Won't Work, as reflected in Primary Research

Long term Investors

- Long-term wealth creation
- Seeking **tax advantages**
- Building a **retirement fund**
- Savings for **children expenses**
- Diversification of portfolio
- **Stable growth** over time
- **Protection against inflation**

Short term Investors

- Being able to **liquidity quickly**
- **Emergency fund** creation
- **Goal oriented investment (e.g., vacation)**
- Looking for **high returns**
- Paying off debt

intraday Investors

- Being able to **liquidity quickly**
- **Emergency fund** creation
- **Goal oriented investment (e.g., vacation)**
- Looking for **high returns**
- Paying off debt

insights that were common across investors

Behaviours

- Start Investing but can't be consistent
- Want personalized financial advice
- Don't want loss
- Seeking consistent/stable returns
- Want's a hands off approach to investing
- New to investing want to learn investment basics
- Don't want to take huge risks
- Want to avoid complex financial products

Time for investment

Time with high tendency to invest

- New year
- salary day
- Near tax submission to get tax exemption
- After getting dividends from existing investments
- Birthday
- Festive day
- Tax refunds after tax filing

Meet our 3 key user personas based on diverse needs and investment horizons

Rajesh,
34, Delhi

New parent, just started investing & earns (~5 to 10 L)

Products Used:
Mutual Funds
Government Bonds
Stocks (Ocassional)

Needs

- **Critical Alerts -** Upcoming SIP, Order Executed
- **Market Updates -** Dividend Payout, NFO
- **Guidance** - Investment Tips, Recommendations

Pain Points

- **Limited time** to actively manage investments
- **Limited knowledge** of investment opportunities

Conservative user

Akhila,
30, Mumbai

Tech savy milenial, wants early retirement (~ 15 to 20 L)

Products Used:
Stocks (Long-term and swing trades)
Active Mutual Funds

Needs

- **Critical Alerts -** Orders Executed
- **Market Updates** - Opening/Closing Bell
- **Investment tools** - Stock info, IPO launch

Pain Points

- Inability to pick the **right investments**
- Inability to get the **desired returns**

Growth user

Nithin,
40, Hyderabad

Passionate investor, loves risk & rewards (~ 30 to 50 L)

Products Used:
Intra-day trades
Futures & Options
Currencies

Needs

- **Reliable Platform -** No Downtime and glitches
- **Technical Analysis -** Charts, Indicators
- **Advance Instruments -** F&O, Currency

Pain Points

- **Missed Opportunities** due to inactivity
- Inability to **optimise returns**

Power user

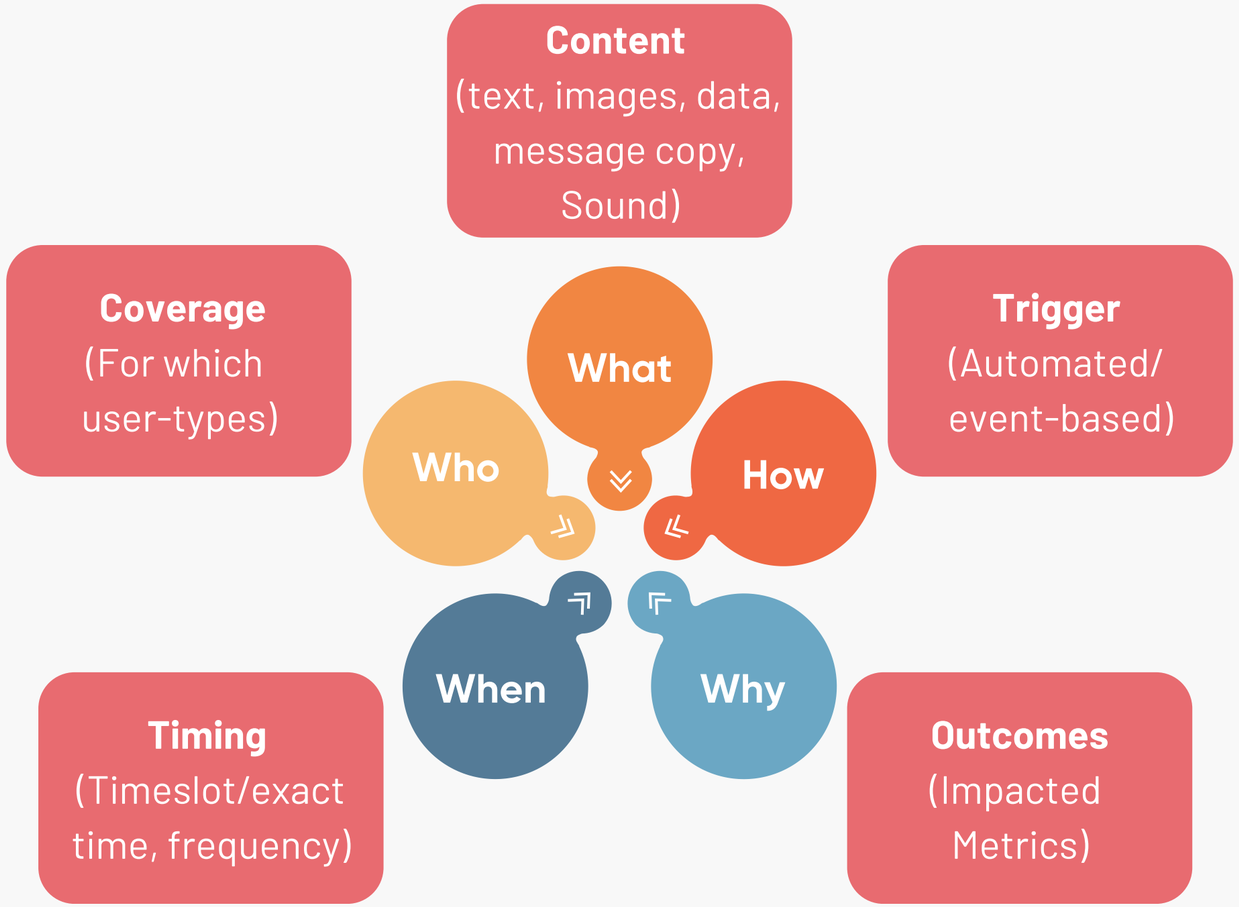

Solution Approach

Our strategy categorizes notifications based on the needs they address and how they are crafted

Notification type
(based on user needs)

- **Transactional -** Orders Executed, Money Deducted etc.
- **Alerts -** Market Open/Close, Major price movements etc.
- **Updates -** Market News, Dividends, Quarterly Results etc.
- **Informative/Educational -** Expert Recommendations, Learning videos etc.
- **Reinforcement -** Showing performance to incentivise action, e.g. Portfolio appreciation
- **Recommendation -** Nudge to explore stocks/MFs. e.g. Buy/Sell from Analysts

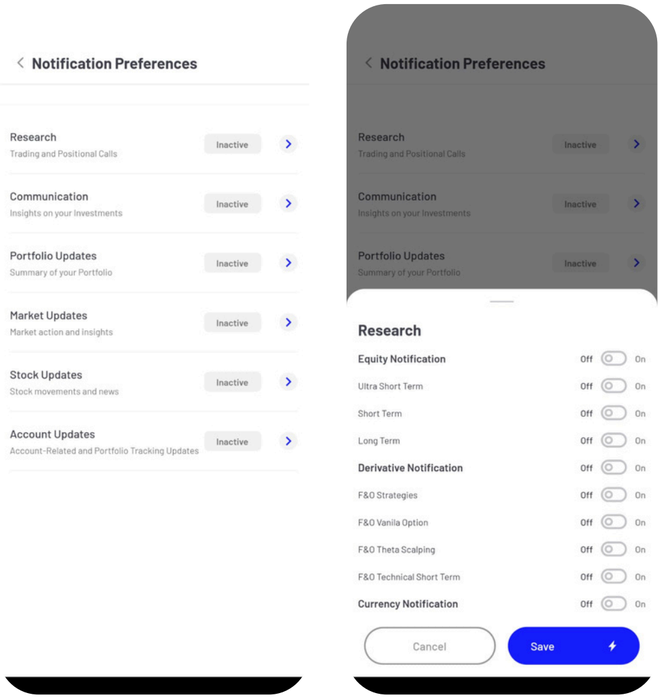

Characteristics of Notifications

We Start by Assessing BlinkX Today: Current Features & Opportunities for Improvement

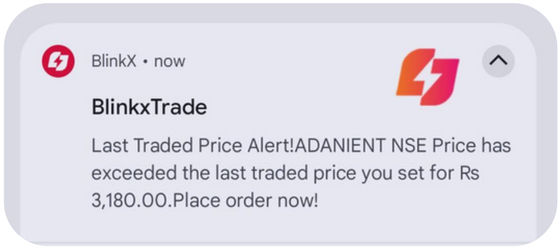

PN Centre

Users can choose triggers for notifications according to their needs

PNs based on history

Apart from transactional notifications, recent history is being used to push PNs

Ongoing Innovation

Google Cloud and BlinkX have announced a collaboration marking the inception of the 'ClienTech' era . **NER, NLP along with a Hyper-Personalized Nudge Engine** are used to nudge users based on past behaviour.

Product Philosophy

S.P.A.R –
Servicing, Pricing, Algorithms, and Research

Dismantle traditional financial barriers, fostering a more **inclusive, personalised, and empowering financial ecosystem**

Playstore reviews

Google Play Store:
5L+ Downloads
4.2K reviews
4.7 star avg. rating

Users love
Customer support
UI/UX

Users had issues with
Glitches

Based on the current state of Blinkx we propose a 4-step plan for Hyper-Personalized Notifications

Starting with a persona based personalisation and upgrading to hyper-personalisation (user level) by using Blinkx's existing features & invesments.

Persona based personalisation

Step 1 — **Creating a questionnaire in onboarding process to segment & find user needs**

Step 2 — **Custom PNs based on unique user needs in segments**

Time	Type	Trigger
Based on general trends	Fomo, loss aversion, reinforcement etc	History , Wishlist

User level (Hyper personalisation)

Step 3 — **Preconfiguring PN centre (current PN centre is all disabled)**

Step 4 — **Custom PNs based on user history & preferences**

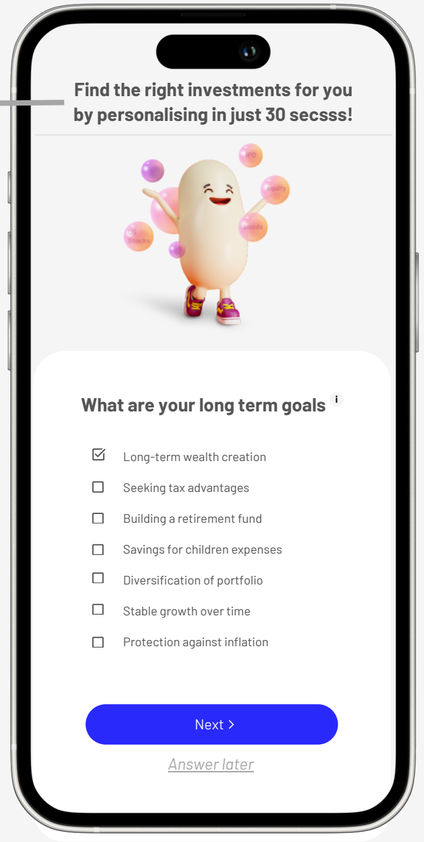

Time	Type	Trigger
Based on past opening time	Based on past opening rate	Based on PN Center & past actions

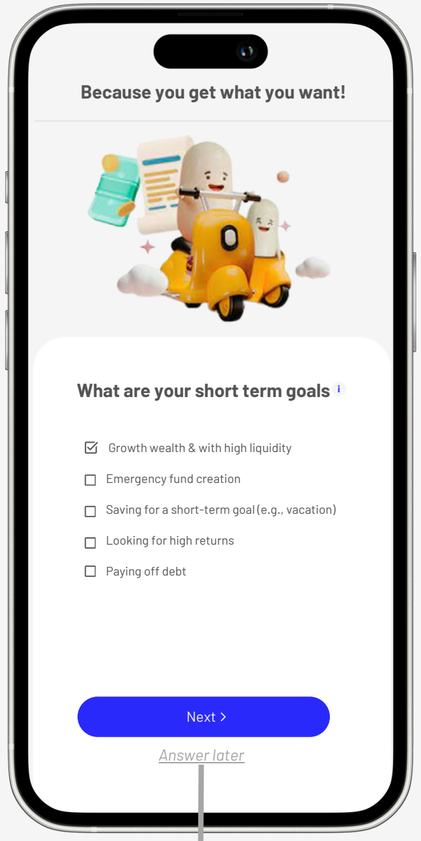

Enough data & feedback is gathered

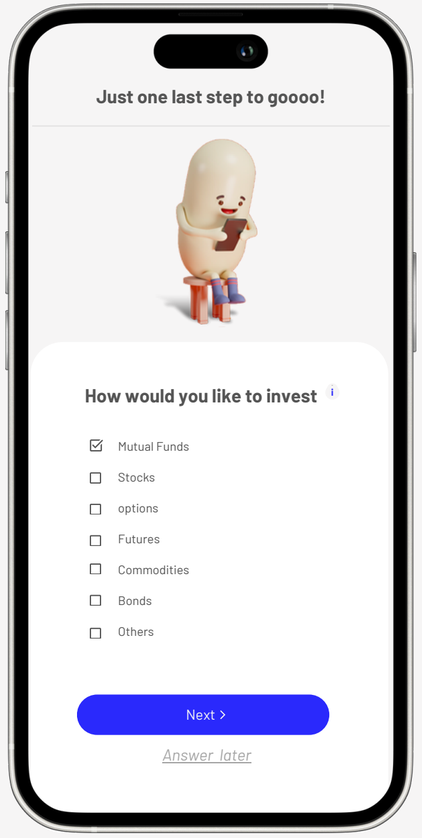

Step 1: Leverage onboarding Questionnaire for Initial Segmentation

Inputs from users would be used in segmenting (Personas) & also customising PNs (Content)

Motivational nudges

Segmentation

Conservative user
Selects upto 2 ~ Mutual Fund & Stocks

Growth user
Selects upto 3 ~ stocks, Mutual Funds, Options

Power user
Selects more than 4 investment types

Users can click on come back later, a PN will pushed after sometime to make them fill it

Step 2a: Personalised PNs for engaging conservative users

User needs

Looking for a few mutual funds/stocks → **Assurance and confidence to make the first investment** → **Encouragement to make additional investments**

Looking for a few Mutual funds/stocks

Sign up — 2-3 Days — **Creates Watchlist** — < 1 week — **First investment** — 1-2 Months — **More investment(s)/ larger SIP** — 6 months + — **Advances to Growth user**

	Kickstart Nudge: search for MF/stock	Market Update	Peformance Updates	Personalised Education	Watchlist Alert
Personalization Element	• Search history • Screentime on a MF/Stock	• Watchlist • Search history • Name	• Bought item • Name	• Bought item • Name • Search history	• Watchlist • Search History • Screentime on a stock
Push Notification	**CTA:** *Based on your recent activity, we think you'll love exploring these MF/stocks! Start your search now.* 🔍	**Invoke Hope and CTA:** *Your wishlisted [item] is on the rise! Click to buy it now*	**Celebrate Progress:** *You're on a roll, [Name]! Your stock just went through the roof!* 👏💰 *Ready for your next big win?*	***Curiosity Tease & Social Proof:*** *Discover what everyone's raving about, [Name]!* 🌟 *Tap here to learn more*	**FOMO Pushes:** *Your selected stock is on fire, [Name]!* 🔥 *Don't miss out on the action*
Time	9 pm to 12 am (Prime time)	9 pm to 12 am (Prime time)	9 pm to 12 am (Prime time)	9 pm to 12 am (Prime time)	Weekly: 9 pm to 12 am (Prime time)
Deeplink	Mutual fund / Stock list	Stock Performance Page	Porfolio page	Blog/research page	Watchlist

↑ **41 %** increase in CTR for personalised PNs used by a Indian Fintech [7]

↑ **3x** increase in impressions for personalised PNs in a Fintech [8]

↑ **190%** increase in retention using push notifications within the **first 90 days** of using the app. [9]

↑ **40 to 60%** increase in open rate of PNs that included CTA buttons [10]

Step 2b: Engage Growth Users with Informative PNs

User needs	Learn about different investment options	Educational content to make informed decisions	Ongoing market updates and insights to optimize portfolio	Tools to manage investments

Looking for portfolio diversification

	Sign up	Watchlist Creation	Increased Engagement	First Investment	Second Investment and Increased Trading Activity	Advances to Power User
	After sign - up	1-2 days	1-2 Weeks	1 Month	2 -3 Months	2-3 months +	1 year+
Proposed PN	**Personalised Tips**	**Market Updates**	**Watchlist Alert**	**Personalised Recommendations**	**Performance Update**	**Feature Highlight**
Personalization Element	• User's expressed interest during onboarding	• Watchlist • User's expressed interest	• Watchlist • Search History • Screentime on a stock	• Transaction History • Transaction Amount • Watchlist	Transaction History	Instruments with largest share in the portfolio
Push Notification	*Ready to make waves, [Name]? 🌊Check out these hot stock tips tailored just for you*	**Personal Coach:** *Stay ahead of the curve. 📈 Key movements and trends to watch*	**FOMO Pushes:** *Your selected stock is on fire, [Name]! 🔥 Don't miss out on the action*	**Foot in the Door:** *Level up, [Name]! 🚀 Time for your second investment. Let's keep that momentum going!*	**Celebrate Progress:** *Superstar alert! 🌟 Your portfolio is shining bright, [Name]. Keep up the fantastic work*	**Empowerment:** *Unlock your potential, [Name]! 🔓 Explore advanced trading tools to enhance your experience. Learn more now!*
Time	One time: Within 1 hour of sign-up	Daily, Real Time for alerts	Weekly: 9 pm to 12 am (Prime time)	Weekly: 9 pm to 12 am (Prime time)	Weekly: 9 pm to 12 am (Prime time)	Weekly: 9 pm to 12 am (Prime time)
Deeplink	Watchlist Page	Blog page	Watchlist	Home Page	Porfolio page	Settings/Feature Page

↑ **70%** customers are more likely to open personalised PNs [11]

↑ **40%** customers open app within 1 hour from PN [12]

↑ **85%** Increase in open rate when using emojis [13]

↑ **70%** customers more likely to open personalised PNs [14]

↑ **15%** MAU increase with performance PNs (from **Duolingo**) [15]

~15% of PNs used in ecommerce area on feature highlight [16]

Step 2c: Advanced, Time-Sensitive PNs for Power Users

User needs	Explore app's full range of features for execution	Access to real-time market data and news	Advanced data analysis and customization options

Quick and efficient execution of trades

	Sign up	After sign - up	0-1 days	3-4 Days	1 -2 Weeks	2-3 months +
		Watchlist and Alerts Creation	First Transaction		Increased Trading Activity	Retention
Proposed PN		**In-App Tutorial**	**Market Alerts**	**Custom Transactional Alerts**	**Personalised Recommendations**	**Re-enage Dormant Users**
Personalization Element		User's expressed interest during onboarding	• Watchlist • Opt-In Settings	• Transaction History • Alerts Setting	• Transaction History • Watchlist • Opt-in Settings	• Historical Login Data • Days since last transaction
Push Notification		*Welcome to BlinkX, [Name]!🎉 Ready to master advanced trading? Start by exploring our in-app tutorial!* 🟦	**Urgency:** *[Name], ⚠ [Stock] is showing a sharp movement. Seize the opportunity now!* 📉📈	***Motivation:*** *Good morning,🌞 Here's your daily summary from yesterday. Review your activity and strategize your next big moves!* 📈💼	***Golden Cross Alert!*** *The 50-day MA has crossed above the 200-day MA for [stock]. This could indicate a bullish trend.* 📈 *Check it out*	***Nostalgia and FOMO:*** *Where Have You Been, [Name]?* 🤔 *The market's been buzzing without you! Discover what you've missed and get back in the game.*
Time		After Sign-up	Real-time (during market hours)	Daily: Morning, Real Time	Dailly, Real-Time	5-7 days since last transaction
Deeplink		Tutorial	Watchlist	Portfolio	Porfolio page	Blog page

↑ **2x** users who opted in to PNs are retained than those who don't [17]

↑ **40%** customers open app within 1 hour from PN [18]

↑ **70%** customers are more likely to open personalised PNs [19]

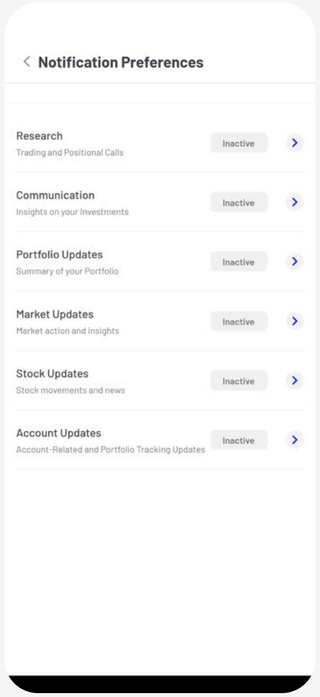

~All of leading neobrokerage firms have custom transaction alerts

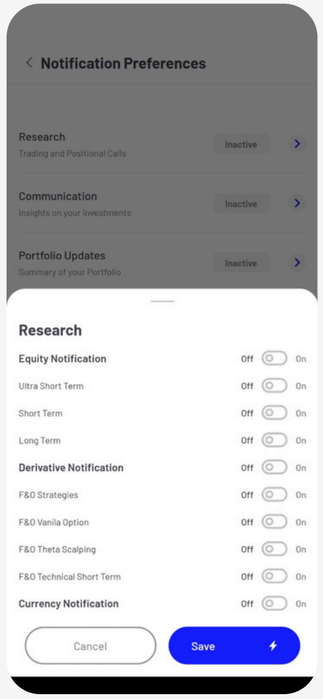

↑ **76%** customers expect their apps to give personalised content [20]

Step 3: Pre-Configure and Adjust PN Center that can be recognifigured by user

Current Notification Centre is completely switched off,
Users may take a lot of time to configure it & they <u>may either overuse it or underuse it ,</u> resulting in bad user experience.

Current

Conservative User

- Kickstart Nudge — off / on
- Personalised Education — off / on
- Market Updates — off / on
- Performance Updates — off / on

Growth User

- Personalised Tips — off / on
- Watchlist Alert — off / on
- Personalised Recommendations — off / on
- Performance Update — off / on
- Feature Highlight — off / on

Power User

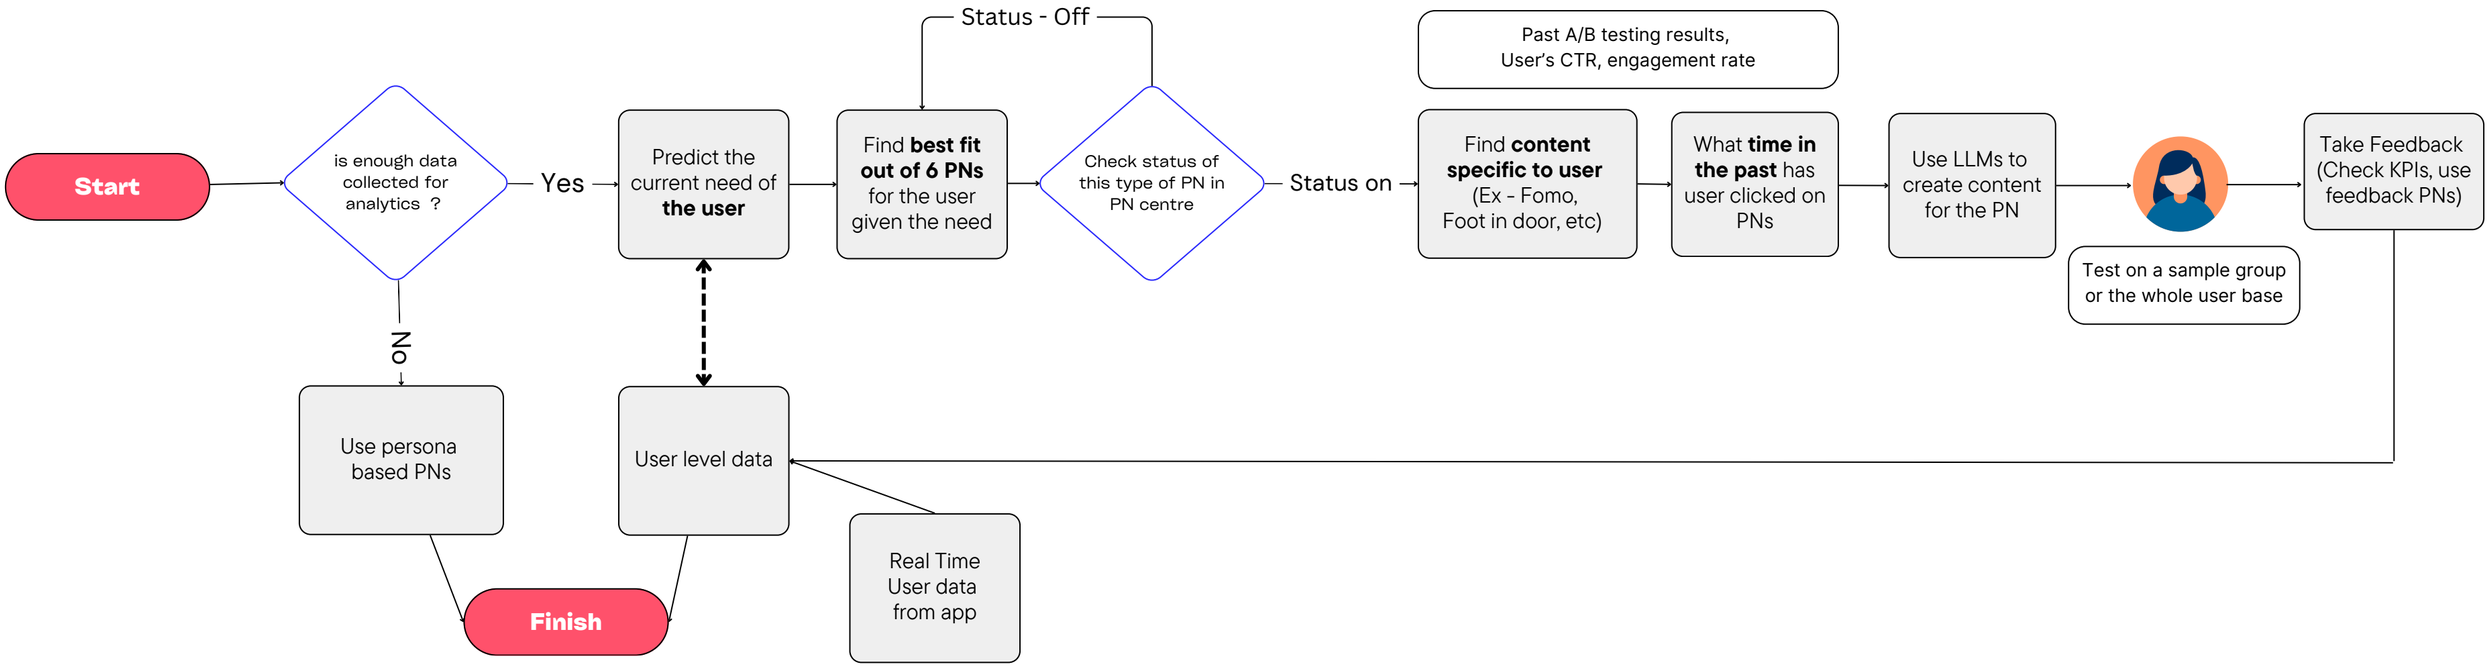

- In-App Tutorial — off / on
- Market Alerts — off / on
- Custom Transactional Alerts — off / on
- Personalised Recommendations — off / on
- Personalised Education — off / on

We plan to pre-configure it based on user segmentation (from onboarding data) this would help save time & also provide the best experience !

Step 4: Hyperpersonalisation from user behaviours

User level personalised PNs by finding the right PN type, content, time using past data & any user settings in the app

by using predictive analysis & hyper personalisation engine

Finally, adhering to some guardrails can ensure that we Hook yet do not Spam

First Impressions Matter

Ensure users receive one or more push notifications within the first 90 days

Avoid Overwhelming Users

Limit push notifications to a maximum of five per day to avoid user fatigue and potential app deletions

Message Length Optimization

Curtail the length of the message to 100 characters

Go Beyond Basics

Move beyond simple PNs and use personalization with user elements for engagment

Deeplinking for Relevance

Ensure push notifications direct users to the relevant page rather than a generic landing page

95% Churn

if users don't receive any notifications at all within the first 90 days [21]

30% Delete Apps

if users receive excessive advertisements and notifications [22]

55 Characters

is the ideal message length for the BFSI sector [23]

4x engagement

through hyperpersonalization whereas simple perzonalisation has less than 1% impact [24]

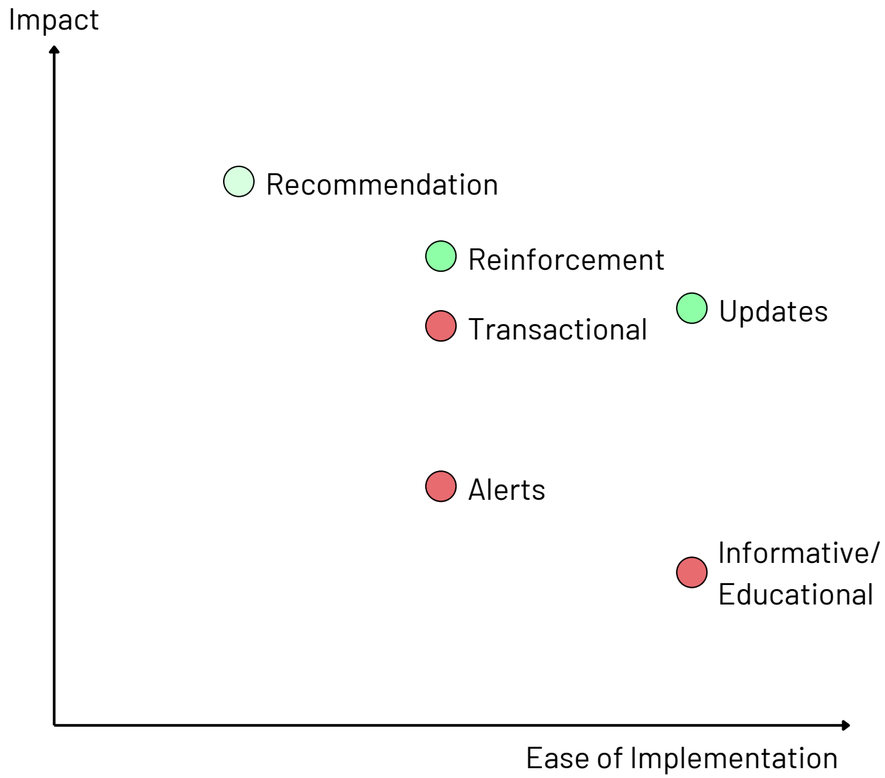

<8 seconds

(average internet user attention span) to drive engagement [25]

Prioritise Low Effort PNs for Quick wins, Test Faster & Scale

PN Type	Description	Conservative (n= 48%)	Intermediate (n=39%)	Power (n=13%)	Total Impact	Effort	Total Score
P1	**Transactional**	2	4	5	3.2	2	5.2
p2	**Alerts**	1	3	5	2.3	2	4.3
p3	**Updates**	2	4	3	3	3	6.0
p4	**Informative/ Educational**	1	3	2	1.9	3	4.9
p5	**Reinforcement**	3	5	1	3.5	2	5.5
P6	**Recommendation**	4	5	3	4.3	2	6.3

1 Impact Increase -> **5**

1 Effort Decrease -> **3**

Decision Rule: Basis Prioritisation, we first pick the notification types with Lowest Effort and Highest Impact in First Phase, post which we can pick the High Impact & HIgh Effort Types

Prioritised:
Reinforcement
Recommendation
Updates

Implementation strategy: plan to deliver targeted & personalised notifications

Optimising before personalisation

- ↑ **70% Delivery rate** for fintech in India- Only 7 out of 10 notifications reach customers. Improving that is required
  Ex - Solve for FCM, OEM, Network issues
- ↓ **40% to 55% opt outs**
  Mention that we won't spam you to reduce opt out percentage
- ● **~15%** of web users opt for push notifications
  Include **Omnichannel experience** as a significant number of web users opt for PNs

Implementing Personalisation

- **Start with 3rd party apps with FCM for** CleverTap moengage
  - Quick implementation
  - Find features that give maximum benefit
  - Connect with WhatsApp, email, SMS for a 360 experience
- **Data Models for hyper-personalisation**
  - Predictive analytics , Hyper personalisation engine ★
  - Next best action analytics for recommendations ★
  - A/B testing or multivariate testing to find the highest CTR
- **Inhouse systems**
  - For custom use cases & cost optimisation

Post Implementation

- **Track opt outs**
  Ensure email promos have nudges to opt in
- **Feedback mechanism**
  Track the notifications that are used by a user for more personalised notifications in future (Ex - if a user clicks more on PNs with educational content, focus on that over CTA)
- **Feedback PN**
  Ask how users are feeling about the app

★ Blinkx's partnership with google cloud would enable complex analytics like predictive & Next Best action resulting in hyper-personalisation for users & a competitive advantage *(Found inspiration from headspace [26])*

We can start with one Notification Type and basic features to test the response, and scale-up progressively

	MVP	Phase 1	Phase 2
Objective	Cover the basic characteristics of the notifications for the top-cases	Scale up all the features that show positive uptick on the NSM	Along with Hyper personalisation, add the features for remaining PNs to improve experience further
PN Types	Updates	Reinforcement Recommendation	Transaction Informative
Characteristics	Heurestics based scheduling Content Copy + Data connections Onboarding questionnaire for User Segmentation	Dynamic scheduling Dynamic Copy using Generative AI	Hyper personalisation

Basis A/B Experiment results

Subject to re-prioritisation

Using the power of Emotions to choose the right notifications

Using FOMO to drive action

Appendix

Our solution makes certain hypothesis which has to be tested using A/B tests before launching at full scale

Hypothesis	**Check Condition**	**Alternate Approach** (If Not True)
Customised PNs lead to higher conversions	Conversion rate improves significantly	Conduct detailed RCA and update strategy
Users will be willing to take time to fill the onboarding questionnaire	Sign-up rate (not droppping significantly)	Move questionnaire to a later stage
Even based triggers give higher conversions	Conversion of event based PNs > General PNs	Check for which user type it is not working, disable for them
Conversion of certain type of PNs (Hope, FOMO, etc.) leads to higher conversion	Conversion rate for certain emotion is higher	Check for other content type (conduct a user research to confirm)
Certain time slots work better for certain type of PNs	Compare conversion of different time slots	Try a different time slot
