About Dhan App

- A Brief Story About The Company

Moneylicious Solutions, a technology trailblazer, showcases unparalleled innovation, driven by a dynamic team, cutting-edge solutions, and market-responsive strategies, defining excellence in the trading and investing industry.

Users under 30

60%

Total Active Users

>1 Mn

Current User persona drives Trading behaviors spurred by product reinforcement behaviors baked in app

Meet the Finance Bro:

- Less Savings, high on spending
- Wants the thrill of trading
- Immediate gratification
- Uber-connected with the market movements
- Is chasing premium and comfort focused offerings

The lost personas

Name	Rahul	Sheena	Aman
Age	28	24	35
Occupation	Consultant	Physiotherapist	Govt Employee
Description	• Soon to get settled • Busy schedule • Has already been trading on Dhan app • Invested in gilt funds on Dhan	• Has been hearing a lot about investing and growing, but has always been hesitant to invest • Risk- Averse • Only wants to invest in MFs	• Likes to play safe and has already invested in lot of LTI and MFs on Zerodha and Upstox • Sees no incentive in switching

Dhan needs to target these personas additionally in orer to maximise the number of active invested users in MF and Equity space

What went wrong

- Dhan app does not provide avenues for long-term investment behaviours

While Dhan has an active user base of more than 1 Mn users, the app does not recognize the difference between wants and needs of the user base and drive behavior change among app users

Users under 30

60%

Total Active Investors

<0.1 Mn

Drive Investments from your user base by recognizing *unmet needs*

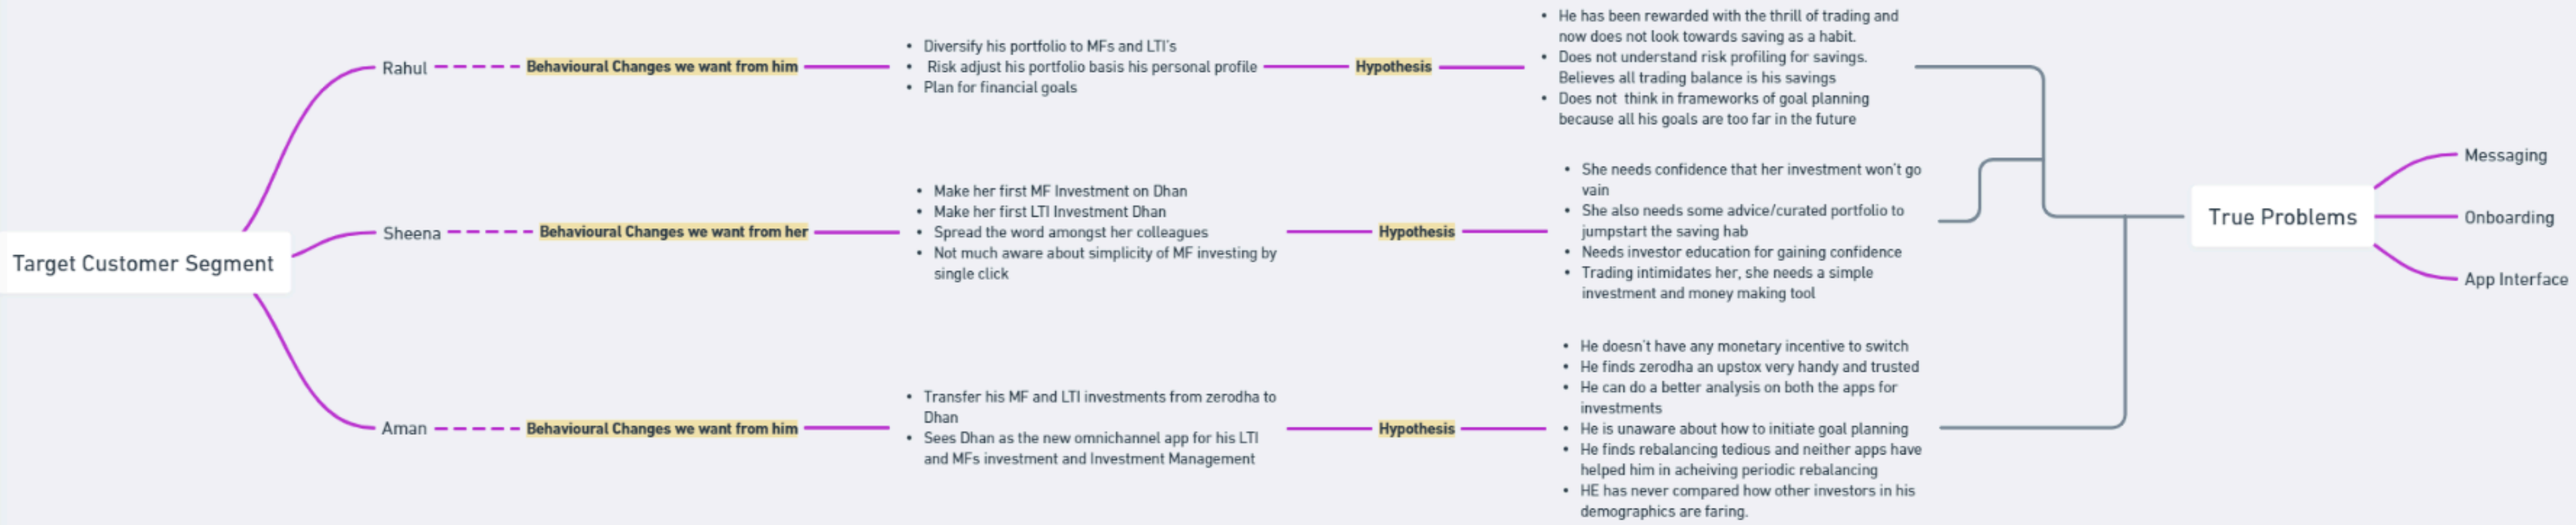

Finance Bro Wants::

- Accomplishment on trading
- Lure of inordinate profits
- Peer Validation of investing in F&O

Finance Bro Needs:

- Retirement planning
- Goals based savings plan
- Long term thinking

Hypothesis Led Problem Identification

Dhan

True Problems

Dhan app grapples with systemic messaging and attraction challenges that result in failure to attract new personas that afavor LTI (Long Term Investments)

- The Messaging
- The Onboarding
- The App Interface

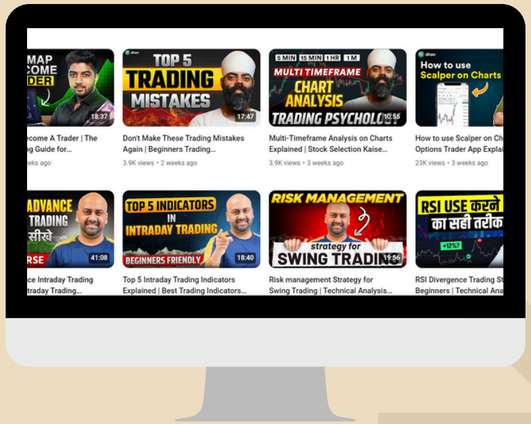

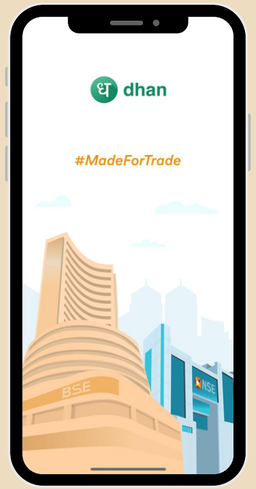

● Dhan

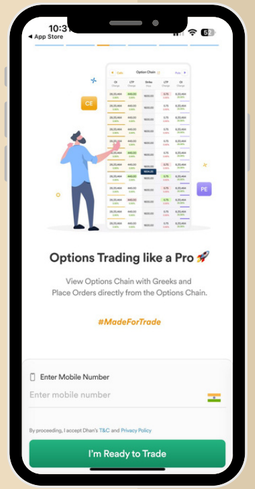

Problem 1: Messaging

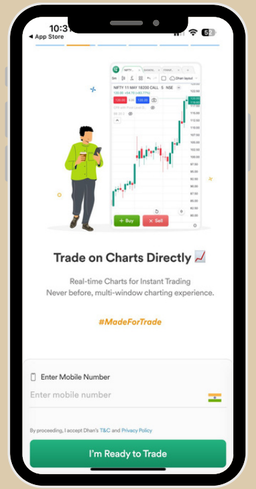

#MadeForTrade →

The App and website landing pages are geared toward Traders. The company promotes trader user profiles by bringing in their motto **#MadeForTrade**. This affects the investor base by alienating them in the short to medium term

Trader Education

Platform is geared twards educating and encouraging Traders into becoming more finance savvy and increase the volume and diversity of trades they partake

Lack of Investor Engagement

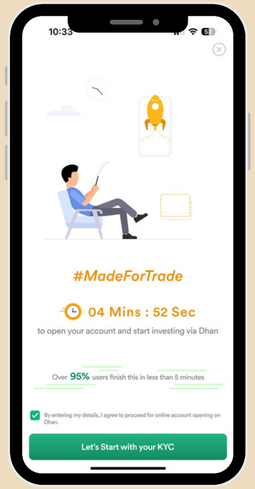

Investors are not provided any market education and encouragement for long term investment planning. **Built for Investor** part of the product Value set does not get highlighted in the app

● Dhan

Problem 2: Onboarding

Trading & Investing →

The App opens a trading an investing form for the new user to fill up as soon as the person tries to enter the Dhan App

Free Look disabled

THe platform does not allow on the app, the chance to interact with trading UIs, Knowledge base, and various offerings until one makes an account

No control on account opening

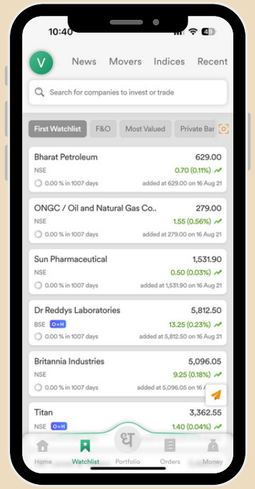

Investors are funneled to trading and investment account opening whereas a standalon investment account may be preferred by the users who are just investing in mutual funds to save up.

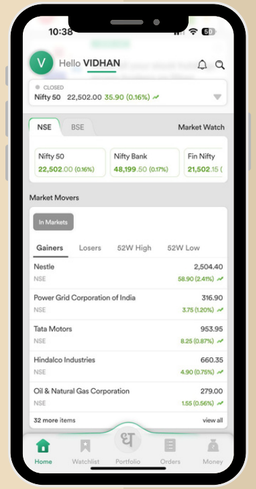

● Dhan

Problem 3: App Interface

Trading & Investing →

The app provides a trader first dashboard of Market movements across indices, gainers, and losers . A holistic view that highlights how much you have saved and if you are on track to reach your goals is not present

Trader first

Overall P&L and open positions section of the page is trader friendly but not investor friendly.
Advice on portfolio rebalancing is absent

Funding accounts

Showcases margins and trader’s diary entries that do not provide utility to the long term investor looking Invest and forget until the goal is reached

● Dhan

01

Stratified Investor View - “Sanchay by Dhan”

02

AI and UX driven goal seeking reinforcement tactics (Investment Monitor)

03

Investor Education videos + Savings Messaging on Social Media

04

The X factor features

#DhanSanchay Karo

Possible Solution Streams

Dhan’s market sweet spot lies in strategically aligning technological innovations with specific consumer needs, driving change in customer behavior and attracting customers on renewed messaging.

● Dhan

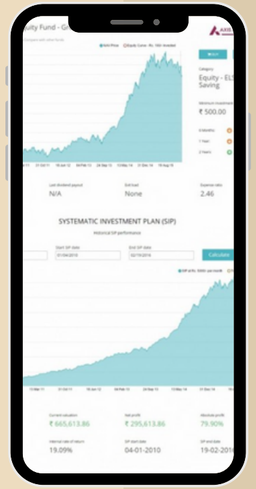

Solution 1: Designated App Landing “Sanchay by Dhan”

#DhanSanchay Karo→

Dhan creates an alternative view for app data displayed which useful for long term investors and savings focused investors driving meaningful savings behavior

Pro Tip: Leading Competitors in the online investment app ecosystem have broken down their apps into 3 separate app- for F&O/Commodities, Trading Equities, Stock and MF , Each app’s marketing messaging is specialized

Your Savings Dashboard

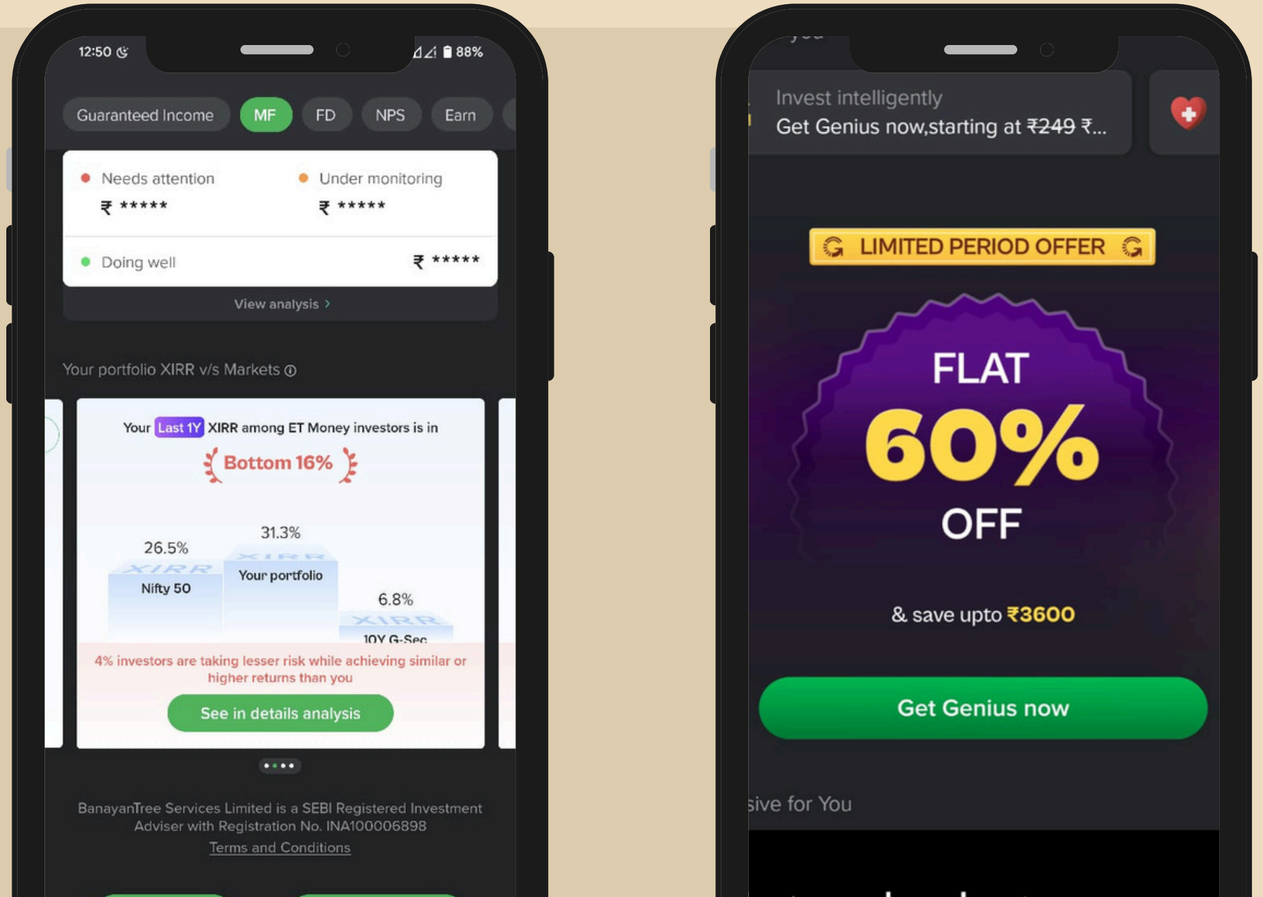

The dashboard shows a split of Equities and MF owned by the Investor along with holding time “Holding Since” highlighted.

The dashboard further shows average XIRR and an option to display holding wise XIRR and Absolute return

Active SIP and SWP

The investor can see the active SIPs for their investment account and also active SWPs with the ability to calculate the net accretion/ depletion

Feature Support for Solution 1

Total Investment Value

Increases user pride question and provides meaningful information about the user's long term goal of reaching a particular sum invested

Artificial Intelligence

Utilising AI based recommendations on the portfolio based on sector and company size to highlight diversification needs for the investor. Eg. Your debt porfolio is low or your small cap exposure is low.

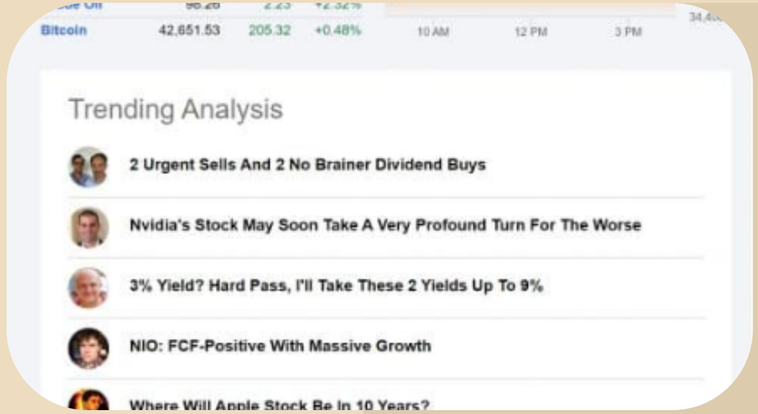

The app can also recommend Equity small-cases in this new section that is lucrative for LTIs

Solution 2: Investment Monitor

#DhanSanchayKaro →

Leveraging benchmarking across investor user base highlights saving habits and investment efficiencies for users that drive further savings on the Dhan app

Pro Tip: Dhan can consider monertizing investment portfolio recommendation generated by AI that are backtested and have beaten the market index returns. On paying the minor monthly subscription, users are able to invest in the mix of MFs that form this market beating portfolio.

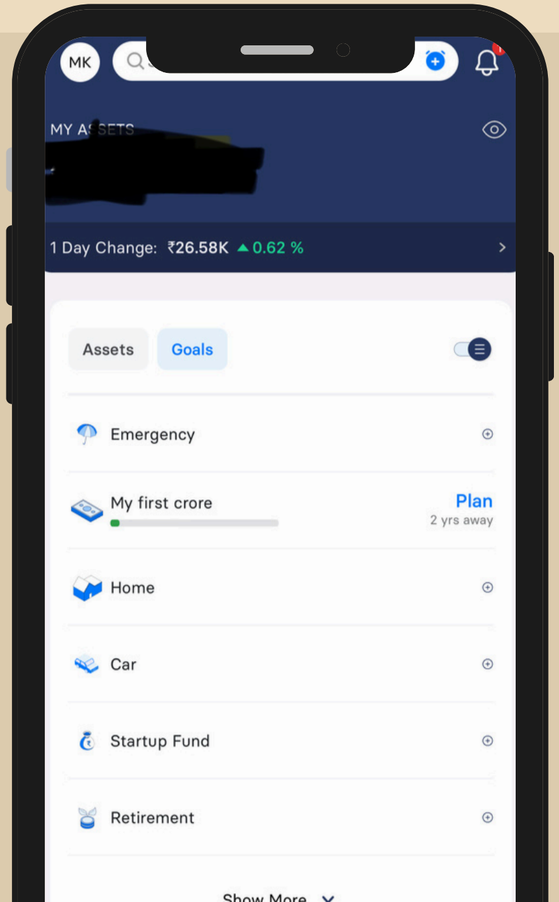

Customer Savings Benchmarking

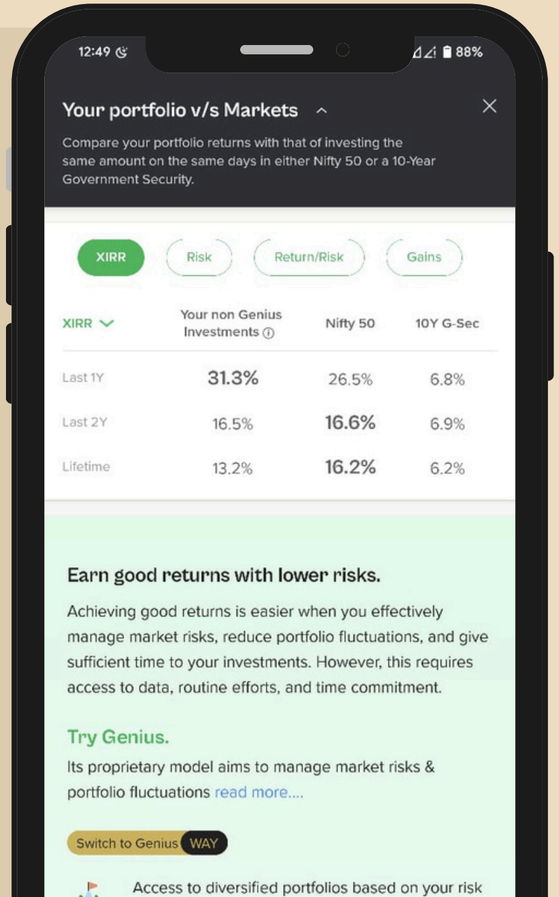

Separate section on the app landing page for the investor view, where the investor can compare their saving rate with the mean savings rate on the Dhan app

Decision Making Based on Investment Efficiency

The benchmarking tool showcases the mean investment returns for the whole investor base and advises users rebalancing recommendations based on category vs stock/MF returns

Feature support for Solution 2

Financial Goals Calculator

Determine your SIP requirements basis your income, future goals and target retirement age. Find the best corpus amount and compare current SIP vs desired SIP across investment categories

Risk Profile

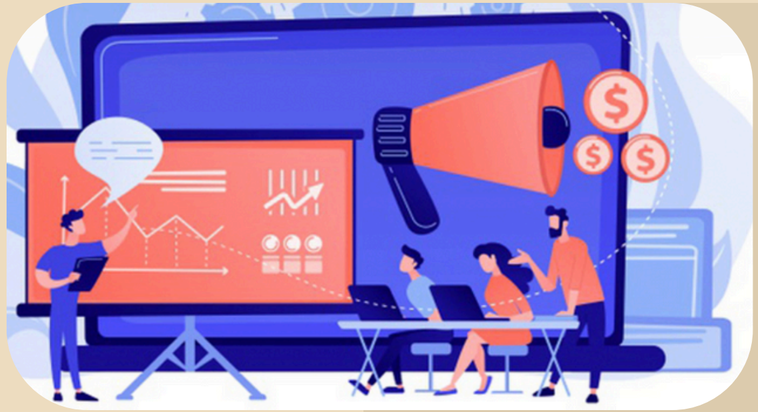

Utilising AI based recommendations on the portfolio based on sector and company size to highlight diversification needs for the investor

Solution 3: Marketing Messaging

#DhanSanchayKaro →

Dhan App needs major overhauling of its marketing messaging of #MadeforTrade into #DhanSanchayKAro for its Investor Focused App section on the Dhan App.

Pro Tip:By having different apps for Dhan, it can be ensured that core personas are onboarded without any friction and no change in the acquisition rate for these personas would occur.

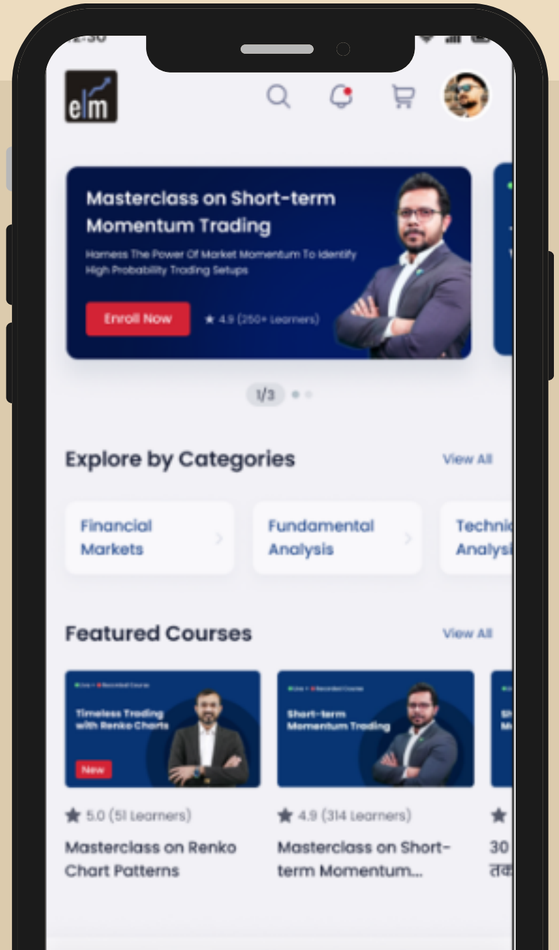

Investor Education for Long term investment

Byte size message dense videos on risk diversification in portfolio, education on choosing fund size and investment advise based on risk profile and age of investor

Social Media Handle for “Sanchay by Dhan”

The social media handle + Youtube shorts are geared for Long term Investors and new personas as defined, who can be onboarded wthrough embedded links

Feature support for Solution 3

Savings Focused Influencers

Dhan app can work with Finfluencers who are focusing on LTI as topic coverage to acquire investor base

Performance Marketing

Dhan can target new app installs by fixing target audience on the new personas that it wants to acquire

Dhan

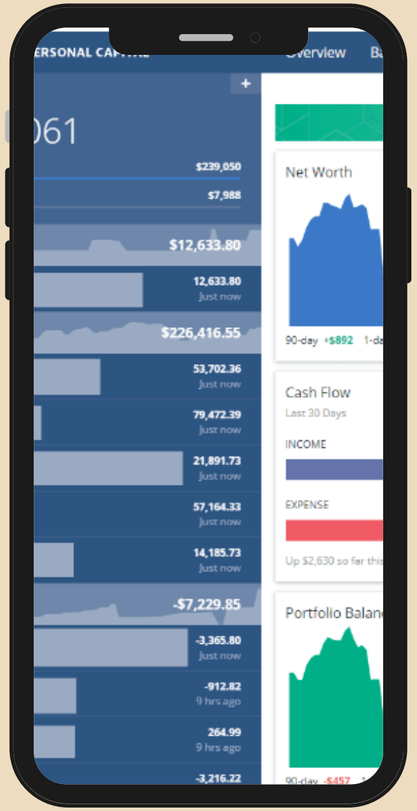

X Factor Features

These features may or may not be present in compete apps but can provide Dhan a competitive edge in winning over other platform customers

Dhan

Only Investment Onboarding

Free Look

Allow investors to enter the application and review indices, top performing MFs and sectoral MF funds offered by various fund houses

Investment Account only

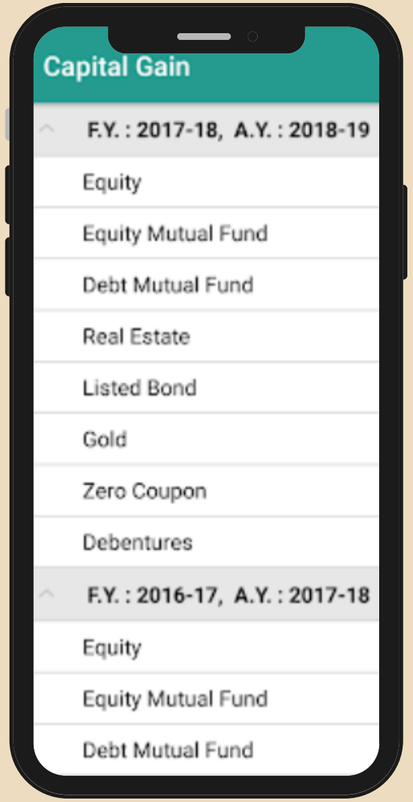

Allow investors to only sign up for Investment account (easier to open) and invest only in MFs with risk optimized, lon-term portfolio

Nudges to allied offerings

After onboarding, use in app notifications and semantic usage data to nudge towards stock purchase

Dhan

Capital Gains Calculator

- **On Demand**

  For all transactions on Dhan app, provide capital gains account summary at the click of a button

- **Yearly summaries**

  Investors receive capital gains calculated based on acquisition and sale price so no individual pays extra tax

- **AI driven recommendation**

  During selling a folio, AI offers advice on selecting a different folio if amore tax efficient rfolio is available. eg. Dont sell ELL< 3 years, Sell LTCG folio instead of STCG folio

● Dhan

Rebalance Calculator

On Demand

Allow investor to plan for a fixed Equity:Debt split in their portfolios

Quarterly summaries

Investors receive complete information on current invested debt:Equity amount in portfolio vs planned Equity:Debt amounts

AI driven recommendation

Recommend liquidation/rebalancing of folios based on tax efficiency and performance of funds so that you never deviate from plan capital allocation

Dhan
