dhan

Product Teardown

BY Aditi Goyal and Geetanjali Suneja

About Company

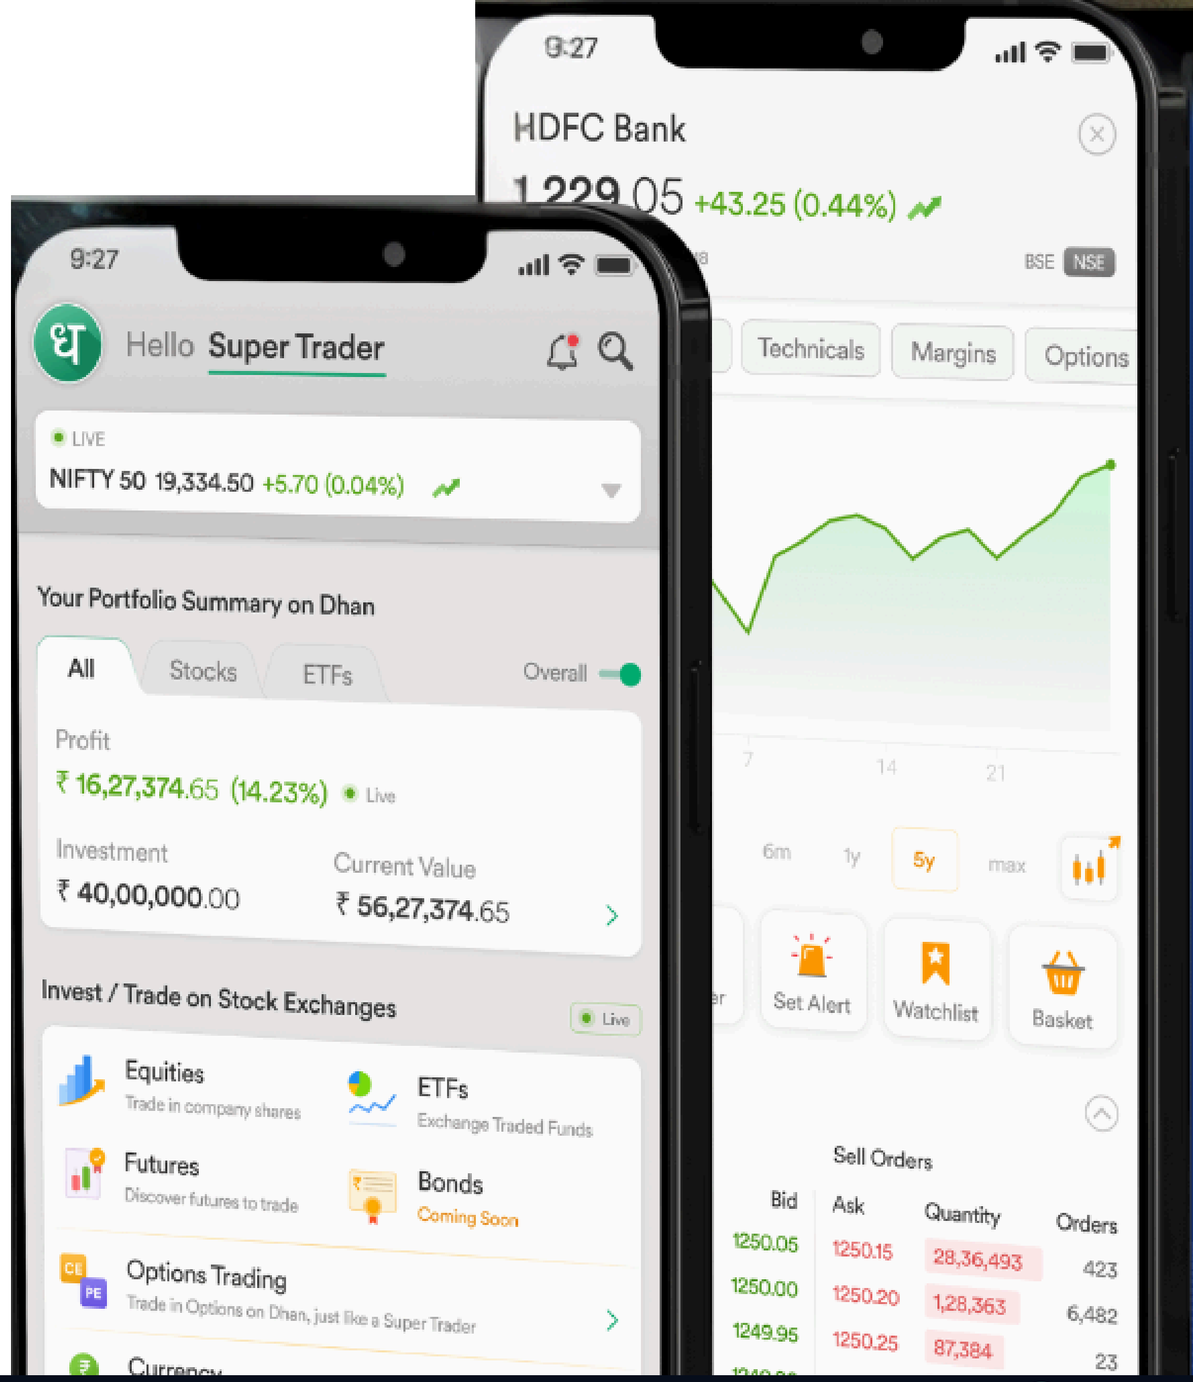

Dhan is a technology-led online stock trading and investing platform for India. Their mission is to help Indians invest and build wealth by participating in the growth of the Indian economy. They believe existing investment platforms are outdated and aim to provide a superior experience for both long-term investors and active traders.

Problem Statement

- Grow Mutual Fund investor base on Dhan to 1 Mn+ in next 12 months.
- To strategically reposition the platform to embrace a large share of long-term investors, focusing on both stocks and mutual funds.
- Ensure the business retains and acquires core personas (F&O Traders/Equity Traders).

Assumptions

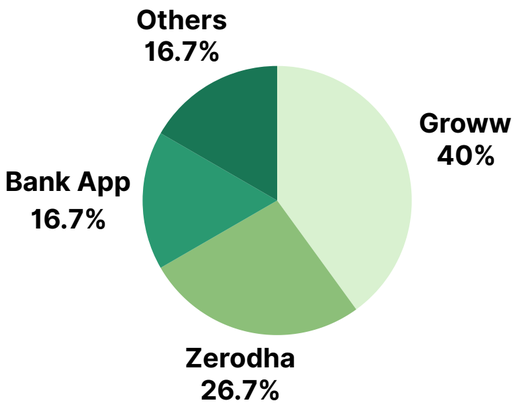

- There is no budget constraint
- Dhan is a growing company
- The current user base is mainly under 30.

Primary Research

We talked to 20+ people to get an idea of their online investment patterns

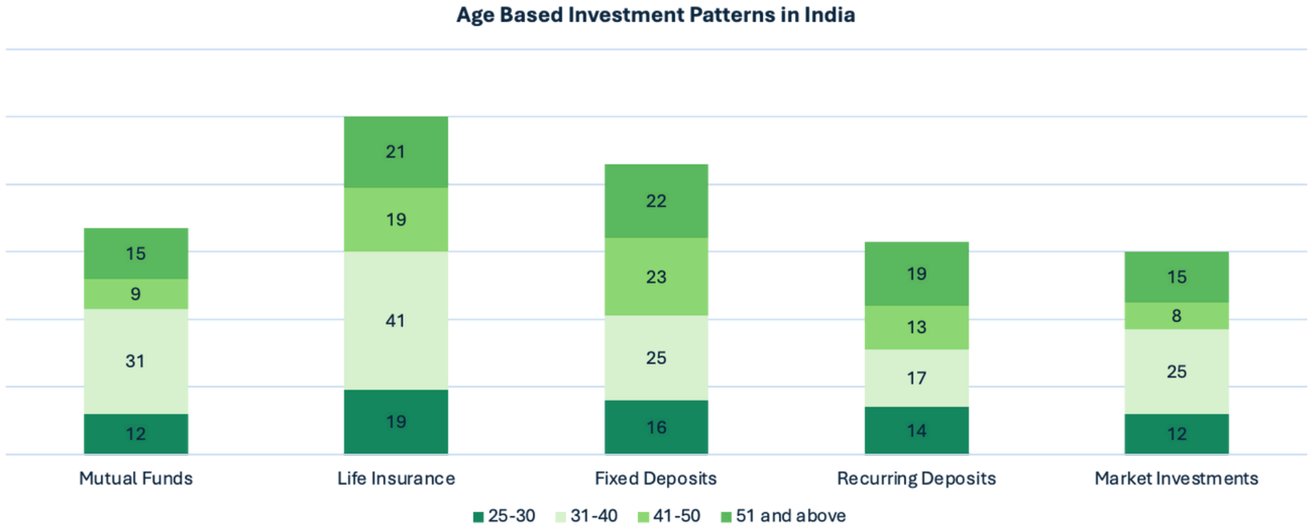

Which app do you use to invest?

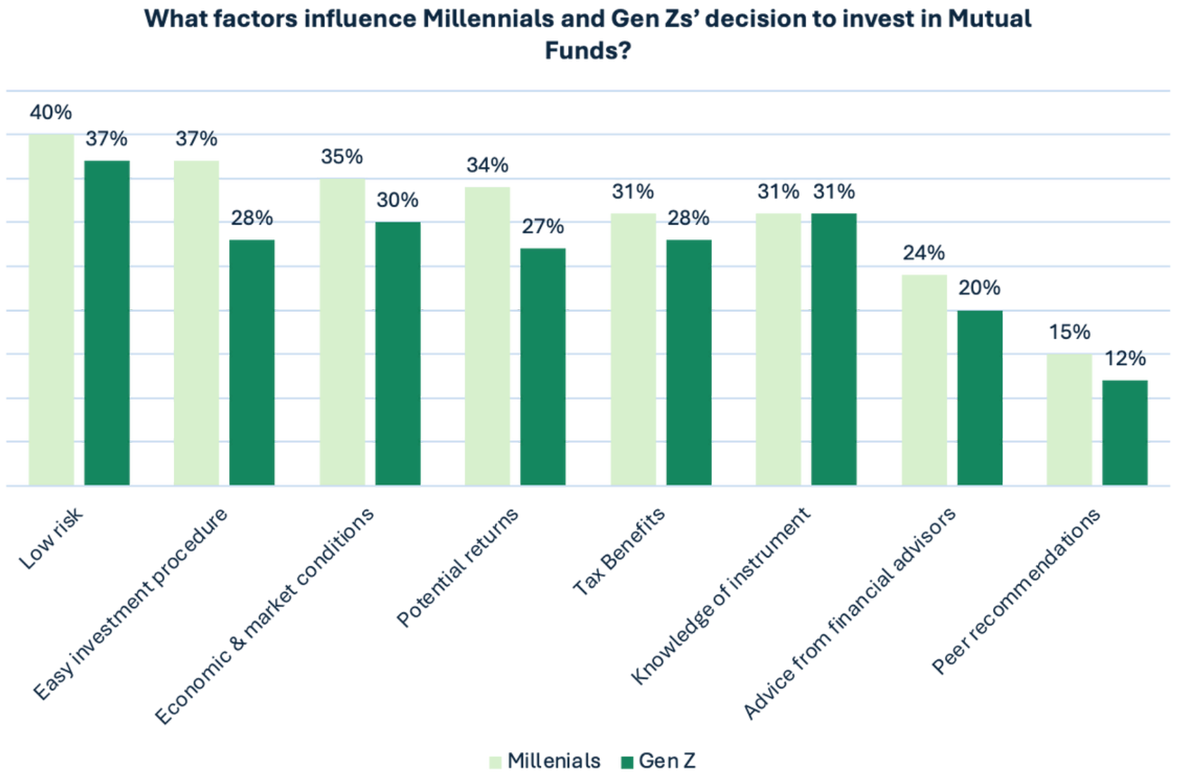

What is your favourite feature?

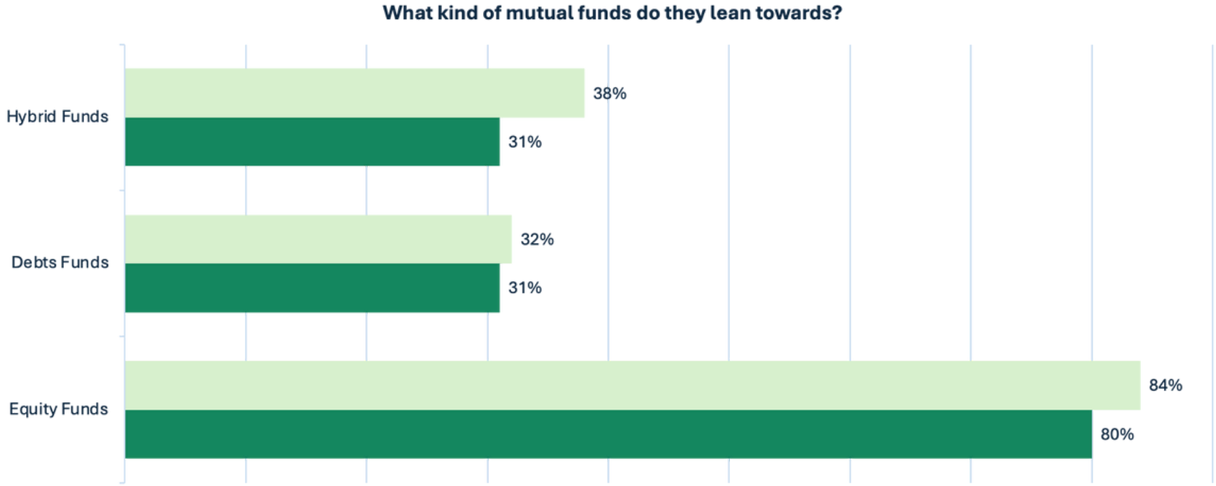

- "Clean UI"
- "Intuitive"
- "Easy to use"

Secondary Research

This tells us that most mutual fund investors are from the age group 25-30 and 31-40. Thus, we further explore Gen Z and Millennial statistics

Source: YouGov and ResearchGate

Gen Z

Age Group: 12 - 27 years

Investing Habits: Want to experiment with a lot of different financial products

Financial Goals: No clear financial goals, they invest mainly to grow their wealth

Preferred Investing Strategy: Stock trading, aggressive/high return MF

Millennial

Age Group: 28 - 43 years old

Investing Habits: Want to invest in safe long term instruments

Financial Goals: Have specific financial goals like kid's education / retirement

Preferred Investing Strategy: Stocks for long term investing, MFs with proper asset allocation.

Awareness

Social Media

Targeted Online Ads

- Linkedin and Youtube, Instagram
- Online News Subscriptions

Collaborating with Finfluencers

- General wealth management advice for brand awareness.
- Hint on MF (long term) investing.

Founder Talks for brand awareness

- In different companies
- and educational institues

Interest

Online + Offline

FinRoast

- Comedians roast celebrities
- Comedians roast audience

QuizOnTheGo

Street event where people are asked about different investing facts and win Dhan goodies

FinQuiz

- Quiz celebrities on finance-related topics
- With a hint of comedy

Adoption

In App Enhancements

Clean UI and regular notifications

- Separate table for MF and Stocks
- Notifications :"WordOfTheWeek", MF News Updates

AIChatbot - Dhani

- Personalised 24x7 advice around investing.
- Dummy questions for curiosity.

Stock Gifting

- Current Users can gift stocks to others which can only be accepted on Dhan

- [x] Upgraded Notifications
- [ ] MF in Sign Up Page
- [ ] Update NavBar for MF tab
- [ ] Portfolio Landing Page
- [ ] Display Most Bought MFs
- [ ] Personalized Chat Bot
- [ ] Single Filterable Search

Here, we're using the psychological principle of **Anchoring**; it causes people to use the first thing they learn or see as a reference point for making future judgments and decisions

Current news notifications are only focused on Stock market Updates; we can start **introducing news or updates regarding Mutual Funds**

Example, "Check out list of MFs that gave over 30% returns in last 5yrs"

We can also start sending out **notifications focused on learning** but targeting mutual funds to anchor users again.
Examples: #LearnWithDhan

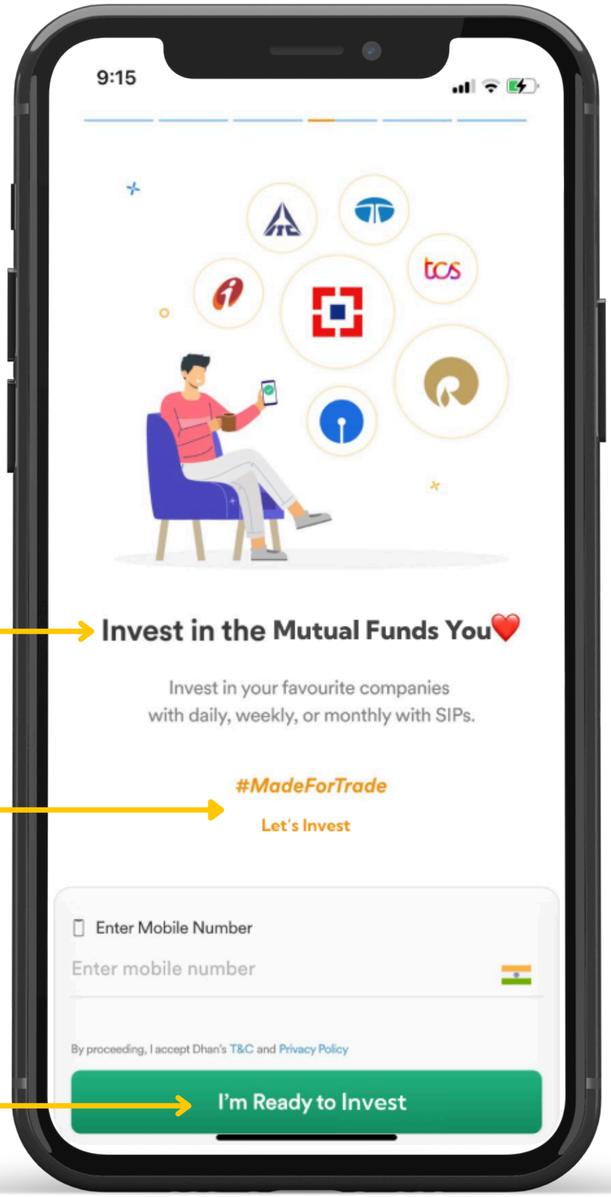

- Word of the Week
- "How to choose Mutual Funds for retirement?"
- "How to choose mutual funds for trip abroad?"

- [x] Upgraded Notifications
- [x] MF in Sign Up Page
- [ ] Update NavBar for MF tab
- [ ] Portfolio Landing Page
- [ ] Display Most Bought MFs
- [ ] Personalized Chat Bot
- [ ] Single Filterable Search

Anchoring - causes people to use the first thing they learn or see as a reference point for making future judgments and decisions

Relying on Anchoring again, we update the **Sign-Up page to show Mutual Funds** for the first time users

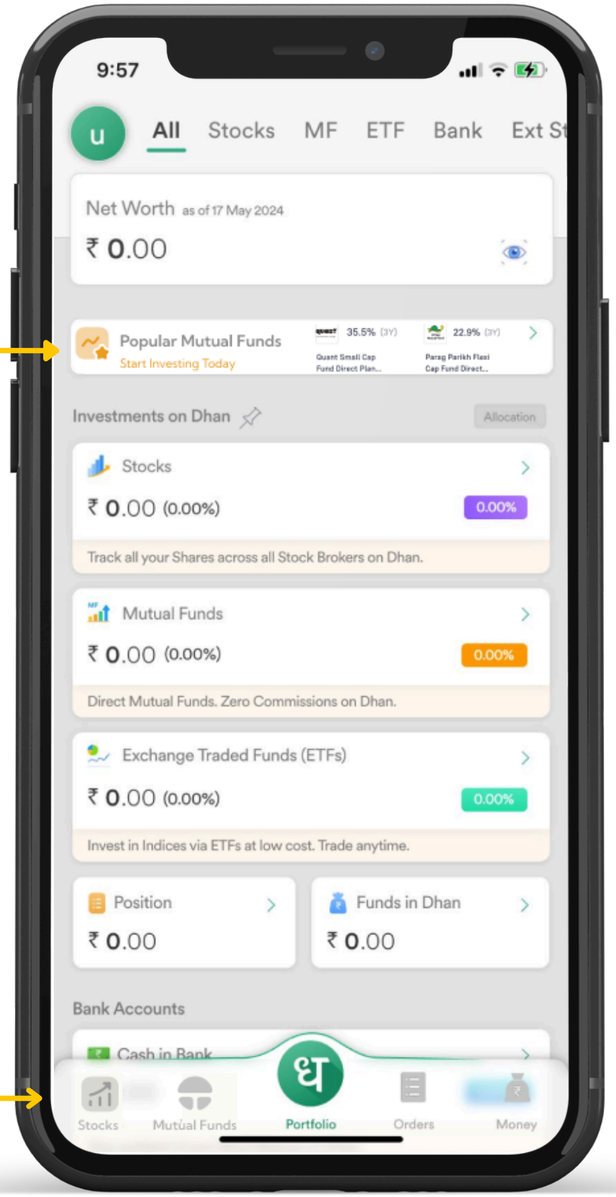

Rather than having trademark lines be based only on 'Trade' we want to **include 'Invest'** as well to achieve an all-rounded profile

Even the tagline #MadeToTrade can be updated to something like **#MadeToInvest** or **#SetToInvest**

- Upgraded Notifications
- MF in Sign Up Page
- Update NavBar for MF tab
- Portfolio Landing Page
- Display Most Bought MFs
- Personalized Chat Bot
- Single Filterable Search

If user hasn't invested in any Mutual Funds, **show Most Popular MFs** to create **curiosity** and **Fear of Missing Out**

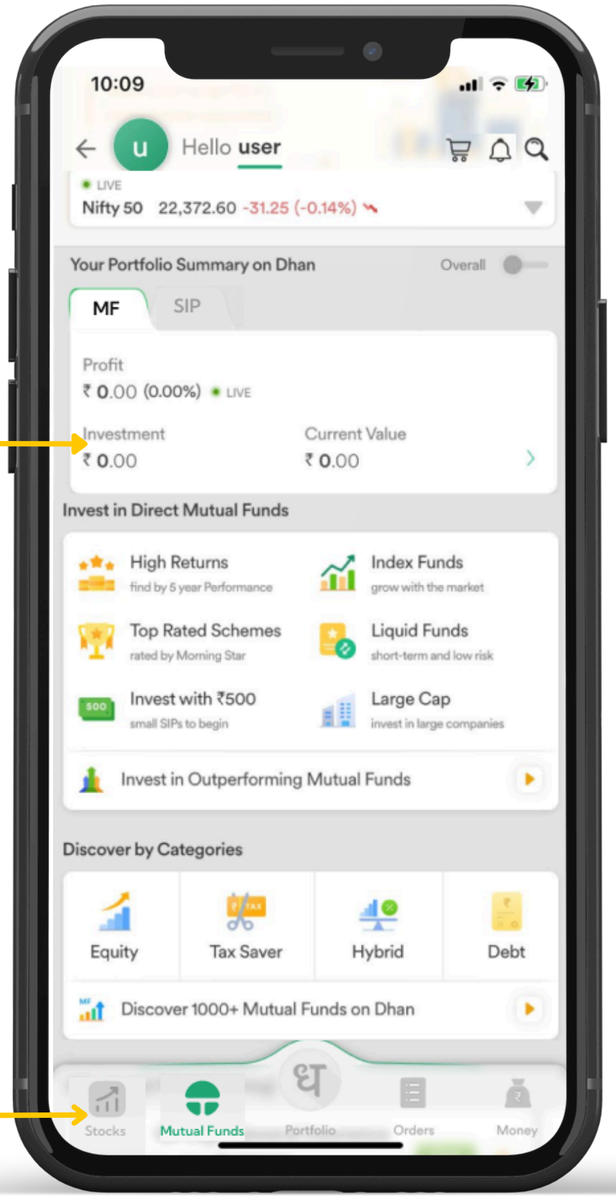

To have **clean UI segregation** and not lose out on visibility, we create two separate tabs for MFs and Stocks. MF will have it's own page

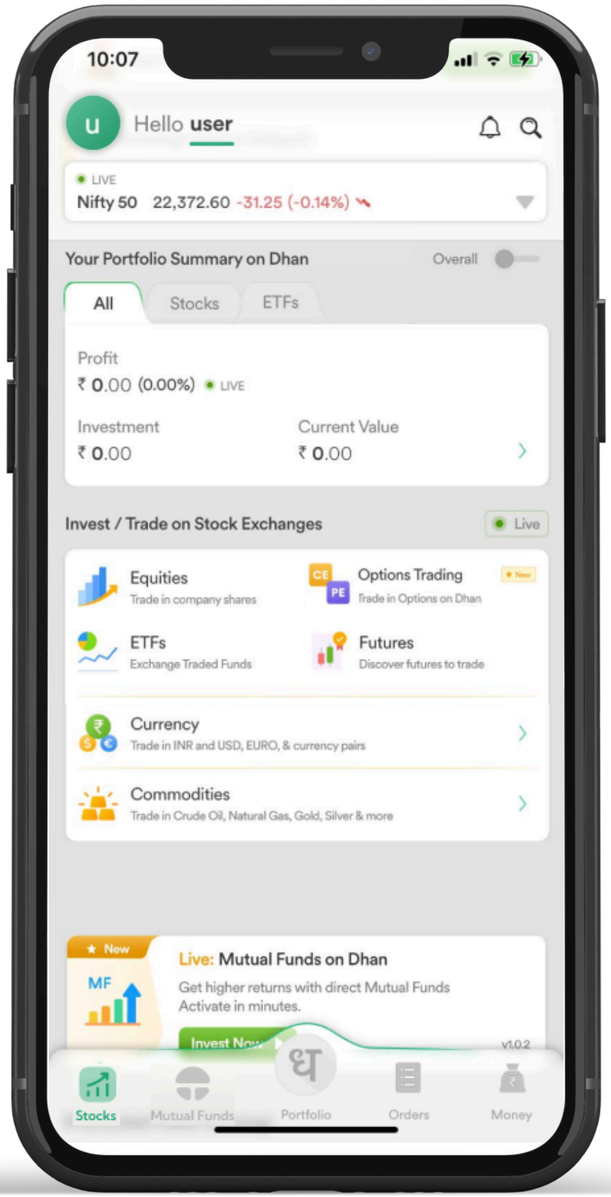

Also, the **NavBar should be constant** rather than continuously hiding and appearing, so as to not disrupt user experience

- [x] Upgraded Notifications
- [x] MF in Sign Up Page
- [x] Update NavBar for MF tab
- [x] Portfolio Landing Page
- [x] Display Most Bought MFs
- [ ] Personalized Chat Bot
- [ ] Single Filterable Search

Show **MF portfolio** and **SIP** at the top
Enable **seamless tab switching**

- Have a common **header** showing Nifty status across to have seamless window switching
- Have similar **search button** in both tabs

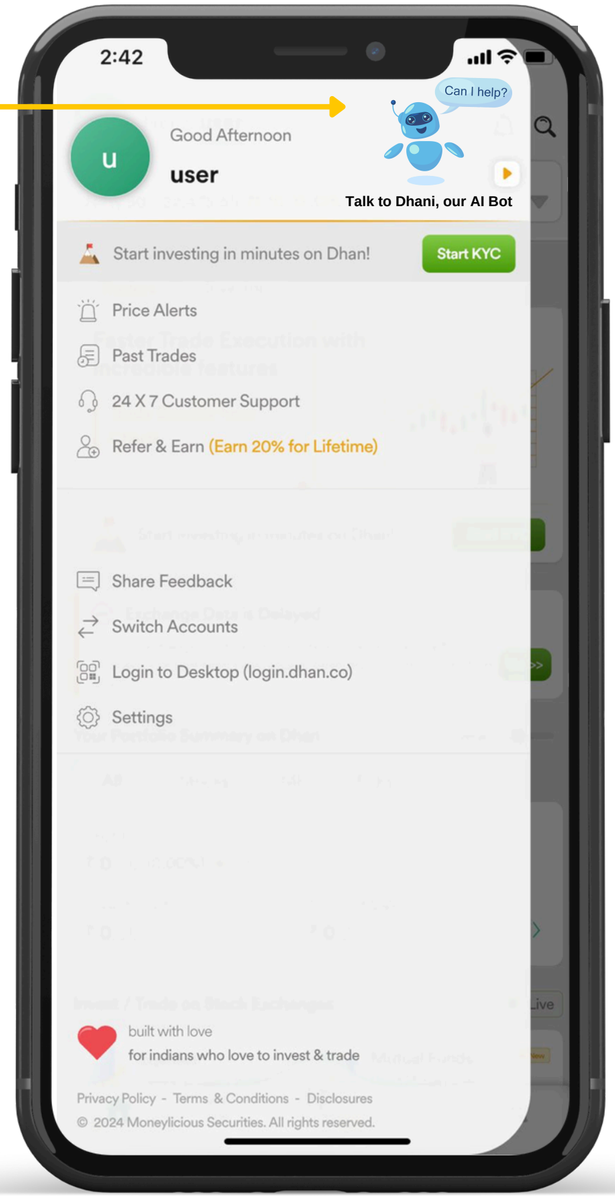

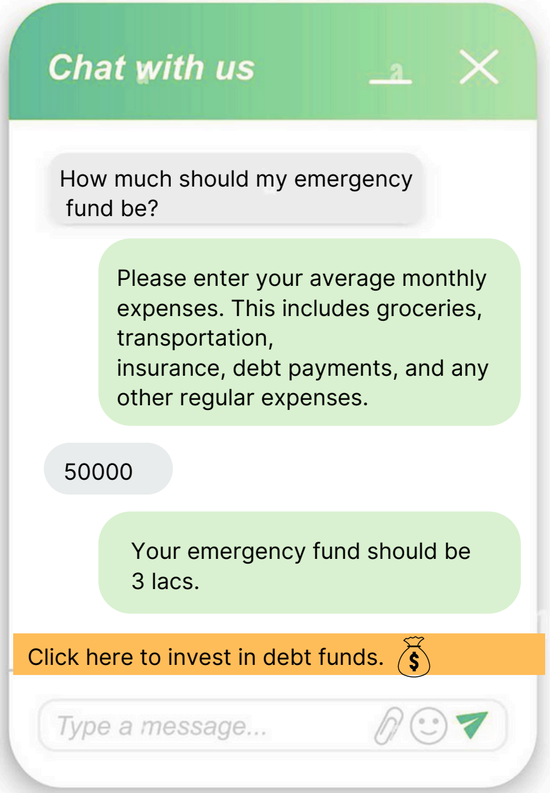

To have **clean UI segregation** and not lose out on visibility, we create two separate tabs for MFs and Stocks. MF will have it's own page

- [x] Upgraded Notifications
- [x] MF in Sign Up Page
- [x] Update NavBar for MF tab
- [x] Portfolio Landing Page
- [x] Display Most Bought MFs
- [x] Personalized Chat Bot
- [ ] Single Filterable Search

Build a **personalized AI Chat Bot, Dhani**.

- Current chat support is only available between 9am-6pm. **Dhani is 24/7**
- Using Dhani, users can **learn** about investing as well as have generic **doubts answered**

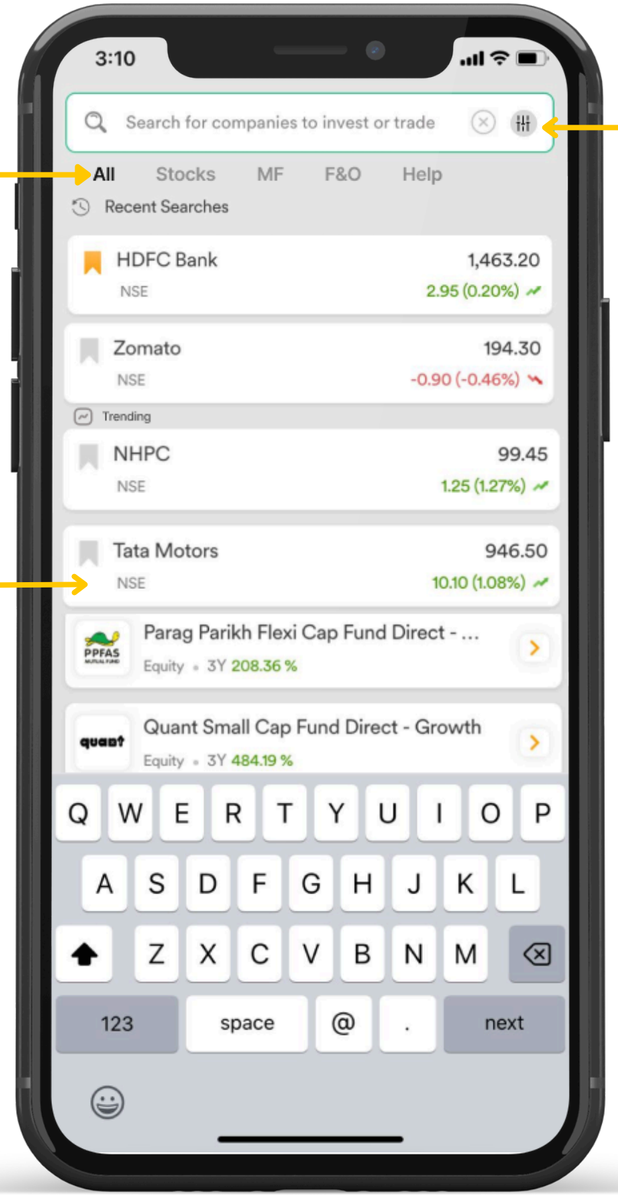

- Upgraded Notifications
- MF in Sign Up Page
- Update NavBar for MF tab
- Portfolio Landing Page
- Display Most Bought MFs
- Personalized Chat Bot
- Single Filterable Search

filter disabled

filter enabled

Currently, search for Stocks and MFs is separate. To increase visibility, create a **combined search,** filterable by **Stocks/MF/F&O** and **Help**, which can have most frequently asked questions directly in app search

Show **Trending Stocks and MFs** in the search option. It can be shown as top 2 from each category to increase visibility

Feature	Impact	Effort	Final Score
Targeted Online Ads	4	2	2
Collaborating with Finfluencers	3	3	1
Founder Talks	5	2	2.5
FinRoast	3	5	0.6
QuizOnTheGo	2	3	0.7
FinQuiz	2	4	0.5
Clear UI segmentation	5	3	1.7
AIChatbot - Dhani	2	3	0.7
Regular Notifications	2	1	2

Based on the **impact effort prioritisation** technique, we suggest going ahead with 4 initiatives in the first phase -

- Targetted online ads
- Founder Talks
- Clear UI segmentation
- Notifications

Based on available resources, additional high-impact strategies can be implemented to drive further success and innovation.

THANK YOU
